?Thanks Commander Obasi!

I am planning to offer testing to all of C dorm as approved by AFOD Mull but I am awaiting approval from FA Allen to get it started. I am thinking we will definitely fine a few more cases in the dorm wide testing but

Good Afternoon,

I have attached the interim reference sheet and assessment algorithm for guidance. This is a snip from the interim reference.

- Known exposure to a person with confirmed COVID-19**
- i. Implement cohorting with restricted movement for detainees housed with the ill detainee or who have been in close contact₁ with the ill detainee for the duration of the most recent incubation period (14 days after most recent exposure to an ill detainee).
 - ii. See also MONITORING above. Monitor cohorted detainees daily to observe for fever and symptoms of respiratory illness.
 - iii. Refer exposed detainees with new onset fever and/or respiratory illness to a medical provider for evaluation.
 - iv. Discontinue cohorting when 14-day incubation period completes with no new cases.

One of the index cases is out of Charlie, so it's already an exposed dorm. It's up to the provider discretion if he/she wants to pull them out at this time- since everyone in the dorm already falls under exposed status. Has the provider decided to swab those 3 new onset symptoms for specimen send out to Cardiotropic? Per the guidance, they all still fall under the exposed and can stay in the Charlie cohort. What happens tomorrow or two days from now if you have more symptomatic detainees out of Charlie? The

Respectfully,

?Right now I have 3 on cots in intake cells and 2 in RHU. But I now have 3 symptomatic from C dorm who we are testing but I assume those should be pulled form the cohort to a separate area correct?

Received. Thank you. May I ask the plan for the B dorm positives given some of the spatial circumstances? Thank you.

Respectfully,

?Please see attached and updated testing log.

Updates:
32 detainees added to offered testing list with results
5 detainees added to positive detainee lists
Dr. Baruiz test results updated and negative on staff testing.

Thank you,
